

Side Cutter Kit

(Left and Right - fits all 68", 72", 80" Buckets)

These Bolt On Side Cutters (BOSC) greatly extend bucket service life and improve penetration power into hard packed soil or stock piled materials. BOSC's are a standard feature on Kubota's buckets and their major purpose is to extend service life of the bucket corners and reduce downtime for costly rebuilds.

Available for: SVL75 + SVL75-2/SVL90 + SVL90-2

48" Pallet Fork

Enhance the versatility of your Kubota Compact Track Loader with a set of Pallet Forks; giving your SVL the capabilities of a rough terrain fork lift. Pallet Forks with standard 48" forks are rated at 5500 LB : A special feature of Kubota Pallet Forks is the "D-ring", which is a tie down ring to secure or pull a load. Consult your Operator Manual for load limitations and Fork ROC.

Available for: SVL75 + SVL75-2/SVL90 + SVL90-2

Construction 4-in-1 Bucket W/Bolt-on Cutting Edge

Loading operations are improved dramatically with this 4-N-1 Bucket simply through the ability to "bottom dump" the bucket. Track loaders are designed to keep loads as close to the center of gravity of the loader as possible for safety and stability and as a side effect are often unable to dump a standard general purpose bucket into a truck or trailer with high sides. With a 4-N-1 Bucket, if you can reach over the side you can load it by simply using the bottom dump. There are many other tasks you can accomplish with this versatile 4-N-1 Bucket from dozing gravel or dirt for precise grading operations, loading, back dragging, back filling, clamping, lifting and scraping.

Available for: SVL75 + SVL75-2/SVL90 + SVL90-2

High Volume Heavy Duty Snow Bucket

This 108" High Volume Snow Bucket is specially designed for maximum efficiency and increased capacity when loading light, loosely-packed materials such as snow. Very popular with Landscapers for handling bark or wood chips or light weight high volume materials. Only available with a straight bolt on edge.

Available for: SVL75 + SVL75-2/SVL90 + SVL90-2

Side Discharge Bucket

72" Side Discharge Bucket is available for the SVL75 and SVL90. Used for trench bottom bedding for pipes or cable protection, foundation footing backfill, highway drainage systems, feed lots, and many more applications.

Available for: SVL75 + SVL75-2/SVL90 + SVL90-2

Concrete Claw

This quality product is designed to pry, cut, tear and rip through concrete slabs. It is made to get under concrete slabs and tear them out while leaving them largely in tact so the claw can carry the slab away.

Available for: SVL75 + SVL75-2/SVL90 + SVL90-2

Available for: SVL75 + SVL75-2/SVL90 + SVL90-2

Auger Drive With 2" Hex Connector

Three models available from 15 to 30 GPM.

Available for: SVL75 + SVL75-2/SVL90 + SVL90-2

Auger Bits

Auger Bits come in a variety of sizes and models according to their application: boring in hard packed clay or boring into ice or rock requires different cutterbit styles and flight angle. Flight thickness will vary significantly too. The center tube is made of thick wall high tensile steel. A special tapered auger bit is available to dig receiving holes for planting trees and is very popular with Landscapers. All auger bits have replaceable cutter bits.

Available for: SVL75 + SVL75-2/SVL90 + SVL90-2

Rotary Cutter - "Land Shark"

Rotary Cutters are used for clearing grass and wild growth from highway medians and utility easements as well as land clearing for housing, parks and recreation areas.

72" rotary Cutter » standard Flow is equipped with 2-blades and available for the SVL75 and SVL90.

78" rotary Cutter » high Flow is equipped with 3 blades and available for the SVL90.

Available for: SVL75 + SVL75-2/SVL90 + SVL90-2

84" SBB Hopper Sweeper

The container behind the brush collects all debris and can be emptied when full. Optional water tank available for dust control for both SVL's. Quick Change (QC) of Brush set is a standard feature. Curb brush is optional.

Available for: SVL75 + SVL75-2/SVL90 + SVL90-2

84" VRS Pick-up Sweepster

Excellent for street, curb, and gutter clean-up, parks, recreation areas and utility work site clean-up. The container behind the brush collects all debris and can be emptied when full. Optional water tank available for dust control for both SVL's. A Quick Change (QC) of Brush set is a standard feature.

Available for: SVL75 + SVL75-2/SVL90 + SVL90-2

84" QCSS Angle Broom STD Flow, Manual Angle

Angle Brooms are ideal for haul road sweeping & clearing and moving, small loose materials, perfect for streets, drives, and job site clean-up. Often used for fresh snow removal. Optional water tank available for dust control for both SVL's. A Quick Change (QC) of Brush set is a standard feature and a Hydraulic Angle Kit is optional too.

Available for: SVL75 + SVL75-2/SVL90 + SVL90-2

Power Rake

Ideal for clearing and preparing soil in general construction, trench backfill restoration, golf course construction and athletic field maintenance and for soil preparation before laying sod. They offer the versatility to remove old lawns and weeds, grade, level, rake, remove debris and prepare seedbeds with one work tool. Its angling ability allows the operator to windrow collected debris for easy pickup and removal.

Available for: SVL75 + SVL75-2/SVL90 + SVL90-2

Soil Preparator

76" Soil Preparator is ideal for tilling and fluffing soil while removing rocks and debris at the same time and collecting those in the bucket behind the rake and all debris can be dumped when full.

Available for: SVL75 + SVL75-2/SVL90 + SVL90-2

Auto Rake

A versatile landscaping tool, this 84" Auto Rake is ideal for pushing debris 2" and larger. No landscaper should be without one.

Available for: SVL75 + SVL75-2/SVL90 + SVL90-2

Tree Forks

Land Developers, Landscapers and Tree Farmers that need to move young trees with their root ball wrapped in burlap will find the quality and versatility of this Tree Fork to be an outstanding value.

Available for: SVL75 + SVL75-2/SVL90 + SVL90-2

Tree Scoop

This quality Tree Scoop is capable of transplanting trees and bushes, removing rocks or stumps, and can even assist in setting stones in retaining walls.

Available for: SVL75 + SVL75-2/SVL90 + SVL90-2

Tree Spade

Dig and transplant trees with speed and efficiency with this Tree Spade attachment for your Kubota. This is the ideal attachment for many applications such as nurseries, landscapers, golf courses, construction, farming, rental yards, Christmas tree farmers, parks and recreation. Note there are different sizes and blade styles available for different soil conditions consult your dealer for correct application.

Available for: SVL90 + SVL90-2

Root Rake

Designed to rip up surface roots, and young wild growth, then push everything into one big pile for disposal. Very popular with land clearing contractors.

Available for: SVL75 + SVL75-2/SVL90 + SVL90-2

Post Hole Driver

A Post Driver makes setting posts quick, easy and with solid results. The use of a Tilt Attach is recommended when used on hill sides and slopes.

Available for: SVL90 + SVL90-2

66" Tiller (STD Flow)

Tillers are designed for breaking up and pulverizing soil, mixing compost or other materials into existing soil, and stabilizing and leveling existing terrain in landscape finish applications. They are ideal for residential, commercial, agricultural, building construction, lawn care and golf course maintenance applications.

Available for: SVL75 + SVL75-2/SVL90 + SVL90-2

Hammer

Hydraulic Breaker. The KBX560Q hammer is available for the SVL75 and SVL90. Note: it is required to use a door with Polycarbonate glass when using a hammer/breaker.

Available for: SVL75 + SVL75-2/SVL90 + SVL90-2

Hammer Mounting Bracket

Hydraulic Breaker Bracket. A Heavy Duty mounting bracket is available for the KBX560Q hammer/breaker for both SVL's.

Available for: SVL75 + SVL75-2/SVL90 + SVL90-2

Water Tank and mounting frame, with 12V pump

This 30 gallon Water Tank Kit is ideal for dust control on Brooms and Sweepers or cooling for your Cold Planer cutter tips. The Kit includes a 12V pump and a HD frame which mounts to existing mounting points in the roof.

Available for: SVL75 + SVL75-2/SVL90 + SVL90-2

Dozer Blade

Dozer Blades are designed for rough and finish grading in dirt and gravel, and light dozing. With their angle & tilt capabilities, dozer blades are better suited for finish grade work in golf course construction and landscaping applications. The 84" Dozer Blade is available for the SVL75 and SVL90. The 96" Dozer Blade is available for the SVL90.

Available for: SVL75 + SVL75-2/SVL90 + SVL90-2

Vibratory Roller (Padded & Smooth Drum)

The VRP84 Vibratory Roller is the ideal attachment for driveway and parking lot preparation, soil compaction where landscapers and paving contractors are its main users.

Available for: SVL75 + SVL75-2/SVL90 + SVL90-2

Tilt Attach

This Tilt Attach allows you to make a nice swale or mound with your bucket and is ideal for golf course work. Tilt Attach's are also recommended when trenching on slopes and hill sides, in order to maintain a vertical trench reducing the chance of cave-ins. Post Drivers will work better with Tilt Attach's to secure a vertical post on hill sides and slopes

Available for: SVL75 + SVL75-2/SVL90 + SVL90-2

Skid Swing Hoe

Skid Swing Hoe will make a small excavator from your SVL - with all the comfort and safety of working from inside the cab

Available for: SVL75 + SVL75-2/SVL90 + SVL90-2

Trencher

Trenchers are designed for cutting narrow straight trenches in the soil prior to laying electrical, telephone and cable lines, or sewer, water and gas pipe. Trenchers are used in residential, commercial, agricultural, building construction, and golf course maintenance.

Trencher >> Standard Flow with 36" or 48" Boom and 6" Chain are available for the SVL75 and SVL90.

Trencher >> High Flow with 36" or 48" Boom and 6" Chain are available for the SVL90.

Since there are a wide variety of digging chain configurations available for different soil conditions, we advise you to consult your dealer for details.

Available for: SVL75 + SVL75-2/SVL90 + SVL90-2

Rock Saw

Rock Saws are designed for high performance trench cutting on a variety of hard or compacted surfaces such as asphalt, reinforced concrete, and rocky or frozen ground.

Available for: SVL90 + SVL90-2

Cold Planer

A Cold Planer is ideal for grinding concrete and asphalt in preparation for a new overlay. Optional water tank with pump is recommended for cutter bit cooling and dust control.

Available for: SVL75 + SVL75-2/SVL90 + SVL90-2

84" Snow Blower

84" Snow Blower (STD Flow)

Available for: SVL75 + SVL75-2/SVL90 + SVL90-2

84" Snow Blower (High Flow)

Available for: SVL90 + SVL90-2

High Volume Heavy Duty Snow Bucket

This 108" High Volume Snow Bucket is specially designed for maximum efficiency and increased capacity when loading light, loosely-packed materials such as snow. Very popular with Landscapers for handling bark or woodchips or light weight high volume materials. Only available with a straight bolt on edge.

Available for: SVL75 + SVL75-2/SVL90 + SVL90-2

96" Snow Blade

This 96" Snow Blade is ideal for cleaning parking lots and drive-ways and is equipped with a trip system to avoid blade damage when hitting a curb or manhole cover. Available for the SVL75 and SVL90.

Available for: SVL75 + SVL75-2/SVL90 + SVL90-2
